Season's Greetings!

It's what PRF wishes all its customers,
friends and partners.

May peace, joy, hope and happiness be yours
during this Holiday Season, wishing you a New
Year filled with personal and professional success.

We sincerely wish you a Merry Christmas
and a Happy New Year!

// main focus

Conclusion of three new CNG and LNG stations

It is with great satisfaction that we announce the conclusion of the three new compressed natural gas (CNG) and liquefied natural gas (LNG) stations, as announced in the last edition of the PRF newsletter.

Located in Azambuja, Matosinhos and Picoto – St. Maria da Feira, they will allow our customers to provide a refueling solution for light CNG-fueled vehicles and heavy CNG and LNG-fueled vehicles, available for the general public. These stations more than doubled the Portuguese capacity for LNG vehicle refueling.

The new stations contribute to strengthen PRF's leading position in the construction of natural gas vehicle refueling posts. ■

Beginning of operations in France

Regarding its Expansion and Internationalization project, in 2015 PRF initiated its operations in France, opening a local office.

This physical presence aims at strengthening our commercial and technical abilities locally, as we move into the French market.

Besides PRF's business as usual activities, given the French market's opportunities, our focus will be on the following business units:

- LNG Satellite Plants
- VNG – Vehicle Natural Gas ■
